High Speed Scanning Service

Now Your Computer Can Read Your Books To You

Microcomputer Science Centre is introducing a new service that converts printed material into a digital format that a computer can “read” out loud.

The Service

- * Drop off or mail a book, or other document, along with a signed copy of our authorization form indicating that the copy is being created for a person designated as special needs. Please ship books attention “Scanning Department” to the address above.
- * We will scan the document using a high-speed scanner and convert it into readable text using Optical Character Recognition (OCR) technology.
- * Document files are prepared by chapter and will be available in Kurzweil Format (.kesi file format). With the document in this format, all of Kurzweil 3000’s reading and study features are accessible, including text magnification, highlighting, voice and text note taking, an on-line dictionary, multiple reading voices, and extensive customization. On screen, the user is presented with an image of each page, complete with tables, graphs, photos, etc.
- * Files are placed on a CD and shipped back to you. You will require Kurzweil software to read these files. Kurzweil is available in Color, Black and White and Read Only versions for both the Mac and PC. The Read Only version is the most cost effective option for the reading of books.

Prices

(Taxes and Shipping are not included. Prices are subject to change without notice)

Single Copy:

Document Length (pages)	Black and White Price per Document	Color Price per Document
1-250	\$37.50	\$75.00
251-500	\$75.00	\$150.00
501-750	\$112.50	\$225.00
751+	15 cents per page	30 cents per page

Additional CD Copies:

For a CD copy, there will be a charge of \$25.00. For these, we will also need a letter and proof of purchase indicating that a corresponding print copy of the document exists as noted above.

Subscription Service

If you are expecting a large volume of books requiring scanning (approximately 40 or more), you might consider a subscription service. For this service we charge \$1000 and offer half price on all scanning for one year. (Please see the prices quoted above).

Kurzweil 3000 Discounts

- * If you have a document scanned, we will provide Kurzweil 3000 at a 15% discount. Please see the prices below (taxes and shipping not included).
- * To take advantage of high speed scanning, the read only package is all that is required.

Kurzweil 3000 Packages	Regular Price	Price with Scanning
Learn Station	\$399.00	\$360.00
Black and White Scan/Read	\$1095.00	\$1049.95
Color Scan/Read	\$1495.00	\$1449.95

Scanning Quality

- * Microcomputer Science Centre assures that all the pages are imaged completely and in the proper order and also spot checks scanning quality. The scanning quality is as good, or better, than the average personal scanner.
- * Microcomputer Science Centre cannot be responsible for the accuracy of recognition as a result of the OCR software due to complex page layouts or math content.
- * When scanning photocopied material, such as Course Packs, the quality of the OCR will be dependent upon the clarity of the photocopy.
- * We provide text and format editing to correct OCR errors and improve the way Kurzweil reads the document at an additional charge. Call for prices.

Binding Removal and Rebinding

- * In order to scan a book, it will be necessary to remove it's binding
- * Books can be placed in a 3 ring binder, or given a comb binding for a small charge at many office supply stores.
